Jong Stit group

Jong Stit group consists 3 companies

1

Jong Stit Co., Ltd

is located in Samut Sakorn, Thailand. Producing many types of Knitted Polyester Fabric such as Interlock, Double-knit, Mesh, Printed, French Terry, Jersey, Tricot, Fleece, Flannel Fabric and etc.

2

Thai Polyester
limited compa-
ny (TPC)

produces polyester yarn such as POY, FDY, DTY, staple fiber, and spun yarn with both yarn-dyed and dope dyed. The company's production capacity is 350,000 tons annually. Yarns and other supplements have been forwarded to Jong Stit Co., Ltd., a factory which is a Polyester Fabric Manufacturer Supplier & Wholesaler, producing various types of polyester fabric, including recycled polyester fabric.

3

Fashion Hometex
Co., Ltd.

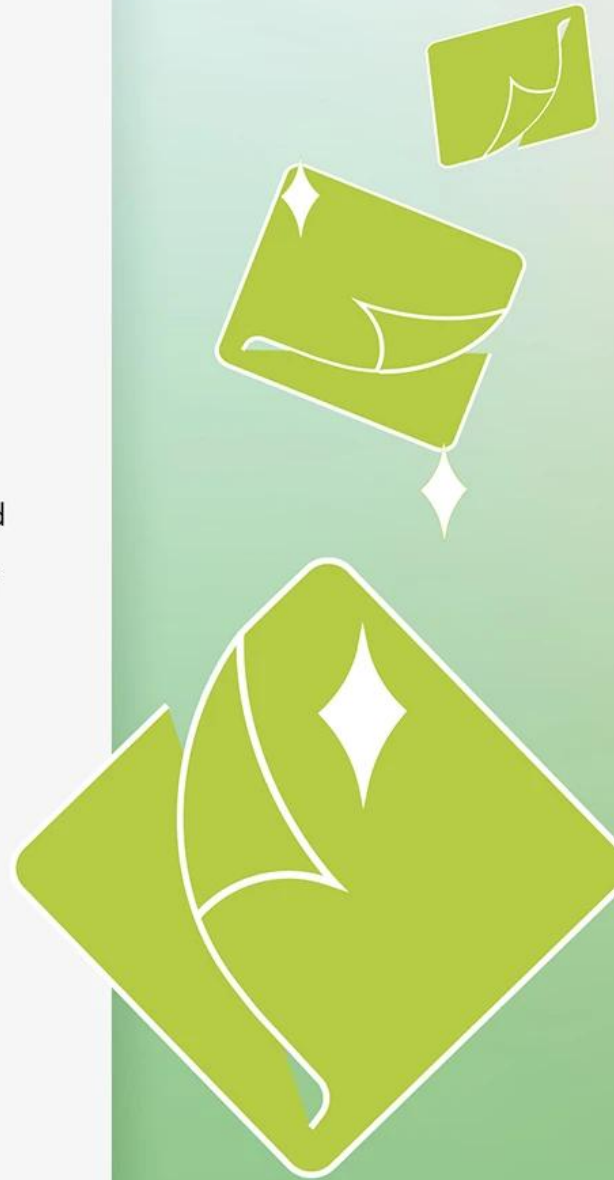

produces blankets and other premium products from fabrics such as pillows cases, blankets, dolls, and blankets; our polyester fabrics and finished products are certified by the international standard OEKO-TEX 100.

Sustainable business is essential

Continuing to Sustainable Business

Jong stit aims to be a sustainable fabric supplier and enhance business with our recycling processes and eco-friendly products.

The company is committed to decreasing environmental problems. Therefore, the firm has started by promoting the knowledge of employees in terms of using various resources cost-effective and efficient.

Consequently, the Increasing environmental policy is the first step toward becoming **a sustainable business**. We are concerned about the importance of **reducing the environmental impact**, both directly and indirectly, in every production process.

The directly decreasing impact is using the recycling process by **bringing plastic bottles through recycling and knit back into fabric**.

Moreover, we reduce processes that will indirectly affect the environment, for example, switching from dyeing to **Dope Dyed** technology to reduce water consumption, management of wastes, water treatment ponds, and increased prevention of various pollutions. Therefore, we desire to be a **Recycled Polyester Fabric** supplier with a stable business operation for the long term in conjunction with being environmentally friendly.

We are the leading polyester fabric manufacturer

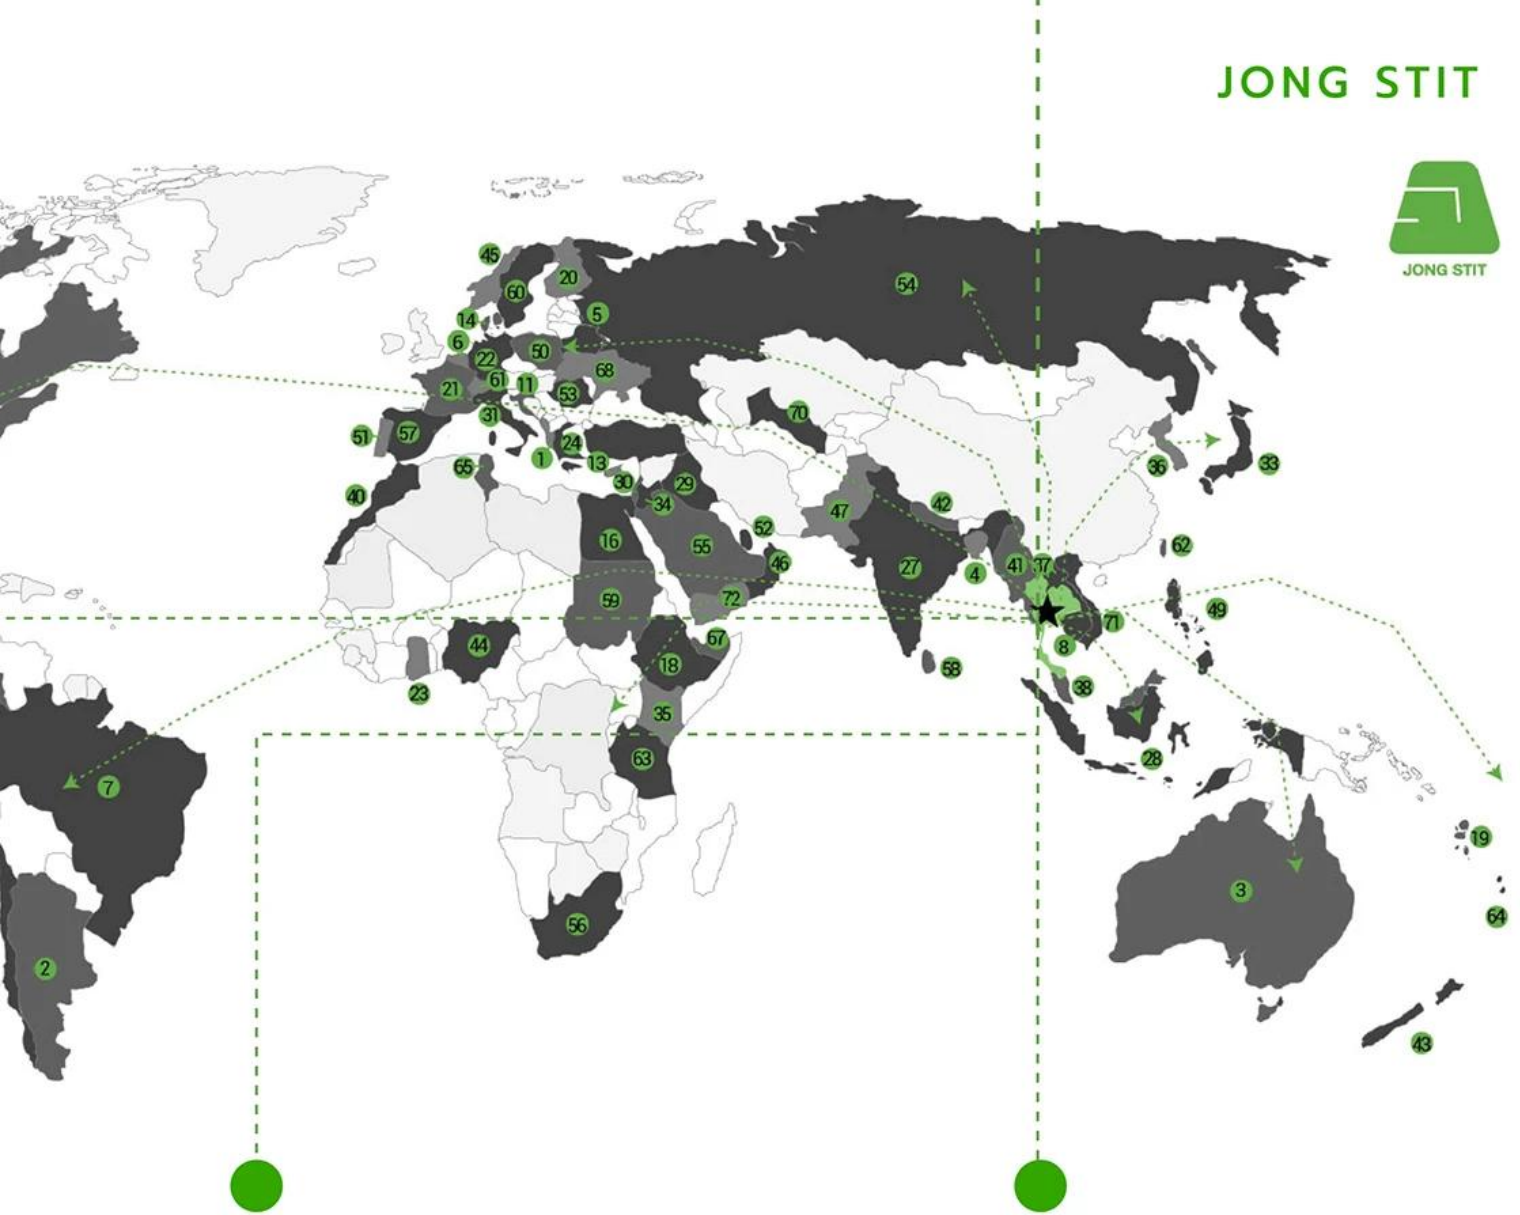

WHY CHOOSE US?

With a long experience, we have won the trust of both local and export customers. We are a professional polyester fabric manufacturer in Thailand, both virgin and recycled polyester fabric. New

01

Cool Quik

Quick Dry and breathable

Cool Quik is a superior fabric with a unique cross ("+") profile that absorbs sweat from the skin to the outer surface of garments. Besides, the unique shape of raw material ensures an increased surface area that enhances the evaporation rate.

02

Anti – UV

Being safe from UV ray

Anti-UV is divided into functional and chemical treatments. Functional Anti-UV knit from the dull yarns where the permanent effect is attached to the fabric over long-lasting product life. On the other hand, the Anti-UV chemical treatment, the effect will be on the fabric for a while. An estimated number of washes are given for different items, approximately 15-20 washes.

Innovation

03

Anti-Bacterial

Prevent growth of bacterial infections.

In this modern-day, many pollutions and plaques are caused by bacteria uncontrollably. Jong Stit is seriously concerned about the health of our customers as bacteria are a social threat. The optimal way we believe, Jong Stit Company desire to protect our customer thereby antibacterial method turning the chemical into the finished fabric to prevent growth and reproduction of the bacteria. Additionally, this chemical we use does not become harmful to customers' skin.

04

Stain Release

Stains easily removed

Recently, stain release finishing is mostly applied to fabrics for the garment. This innovation fights tough stains and soil to provide lasting beauty and longevity to the fabric because the stains on the fabric are easily removed when laundered.

05

Water Repellency

Preventing water penetration

This technology enhances fabric property to prevent water penetration. As a result, the water particle will not easily go through the fabric surface and even absorb or penetrate the fabric as lotus leaves.

High Quality

Jong Stit's products

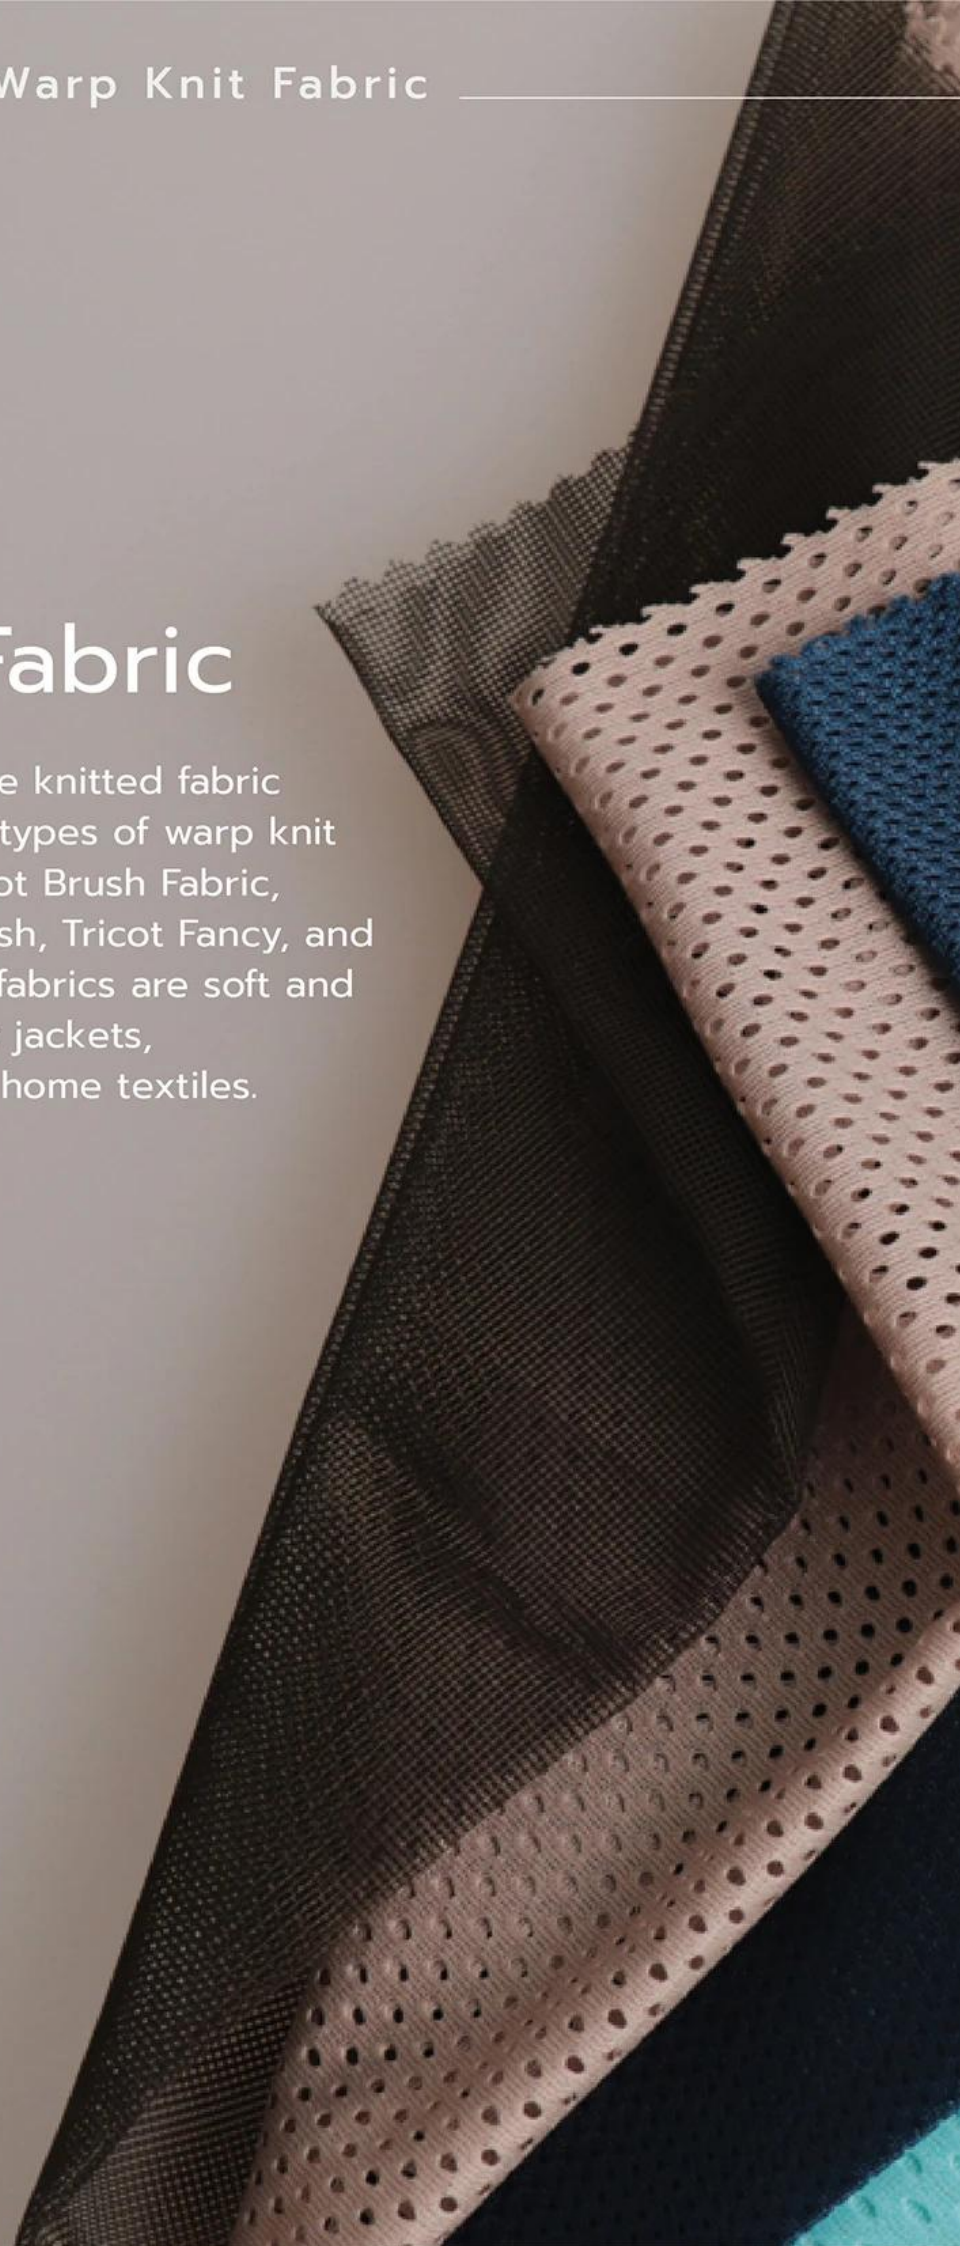

Circular Knit Fabric

Circular Knit Fabric is a kind of fabric from a circular knit machine that works by using yarn with a 360-degree cartridge of needles, creating a seamless fabric tube. Jong stit is the Circular Knit Fabric supplier with various types of circular knit fabric such as Circular mesh fabric, Pique, Interlock, Double knit rib, Single Jersey, Jacquard, French Terry, Sweater and Spandex. All of our circular knit fabrics are stretchy, soft, and breathable. The principal used is sportswear, leggings, underwear, and fashion wear.

A several types of Warp Knit Fabric

Warp Knit Fabric

Warp knit fabric is one of the knitted fabric families. We provide several types of warp knit fabric: Tricot Half fabric, Tricot Brush Fabric, Tricot Satin Fabric, Tricot Mesh, Tricot Fancy, and Tricot Velvet. Our warp knit fabrics are soft and wrinkle-resistant, perfect for jackets, sweatpants, Polo shirts, and home textiles.

Fluffy Flannel Fabric

Flannel fabric

Flannel fabric is soft to the touch & moisture-wicking. We produce both one and two-sides brushed Flannel Fabric, a popular choice for winter wear.

ผ้ารองขมพู / Jumbo cord

Jumbo cord

Jumbo cord is a soft, durable fabric with raised velvet-like ribs that add warmth, texture, and a classic feel. The ribbed surface gives it a unique look, making the fabric strong and long-lasting. It's comfortable to wear and holds its shape well—perfect for jackets, pants, cushions, bags, and upholstery.

Soft and Warm Fleece Fabric

Fleece Fabric

Fleece fabric is a soft and warm fabric, a fantastic pick for the clothing and blankets industry. Our manufacturer produces abundant kinds of Fleece Fabric such as Polar Fleece, Sweater Fleece, Boucle Fleece, Velour Fabric and Vel-fleece Fabric.

Boa Fabric

is a faux fur fabric with softness. We are a leading Boa fabric supplier in Thailand, the company produces 3 types of Boa fabric which are;

- 1.** *Sherpa fabric* is made of thermal material, fluffy and sticky similar to real fur. Suitable for jackets and even better when laminated with overcoats or hoodies. It can be used in laminated doormats, as it is very stretchy and durable.
- 2.** *Plush Toy* is the fabric for the toy industry that contains several characters and specs.
- 3.** *Poly Boa fabric* contains an ultra-soft touch, is flexible, and dries quickly. It's ultimately designed as soft toys, cushions, and clothing.

Most commonly used towel

Terry Loop Fabric

Terry Loop Fabric is a knitted fabric with a long loop absorbing water. We have 2 kinds of Terry loop, one-side brushed, dry fast, absorbent, and durable. This kind of Terry Loop is commonly used for doormat and slippers. Two-side brushed terry loop fabric is used in cloth industrial, bathrobes, or hotel towels.

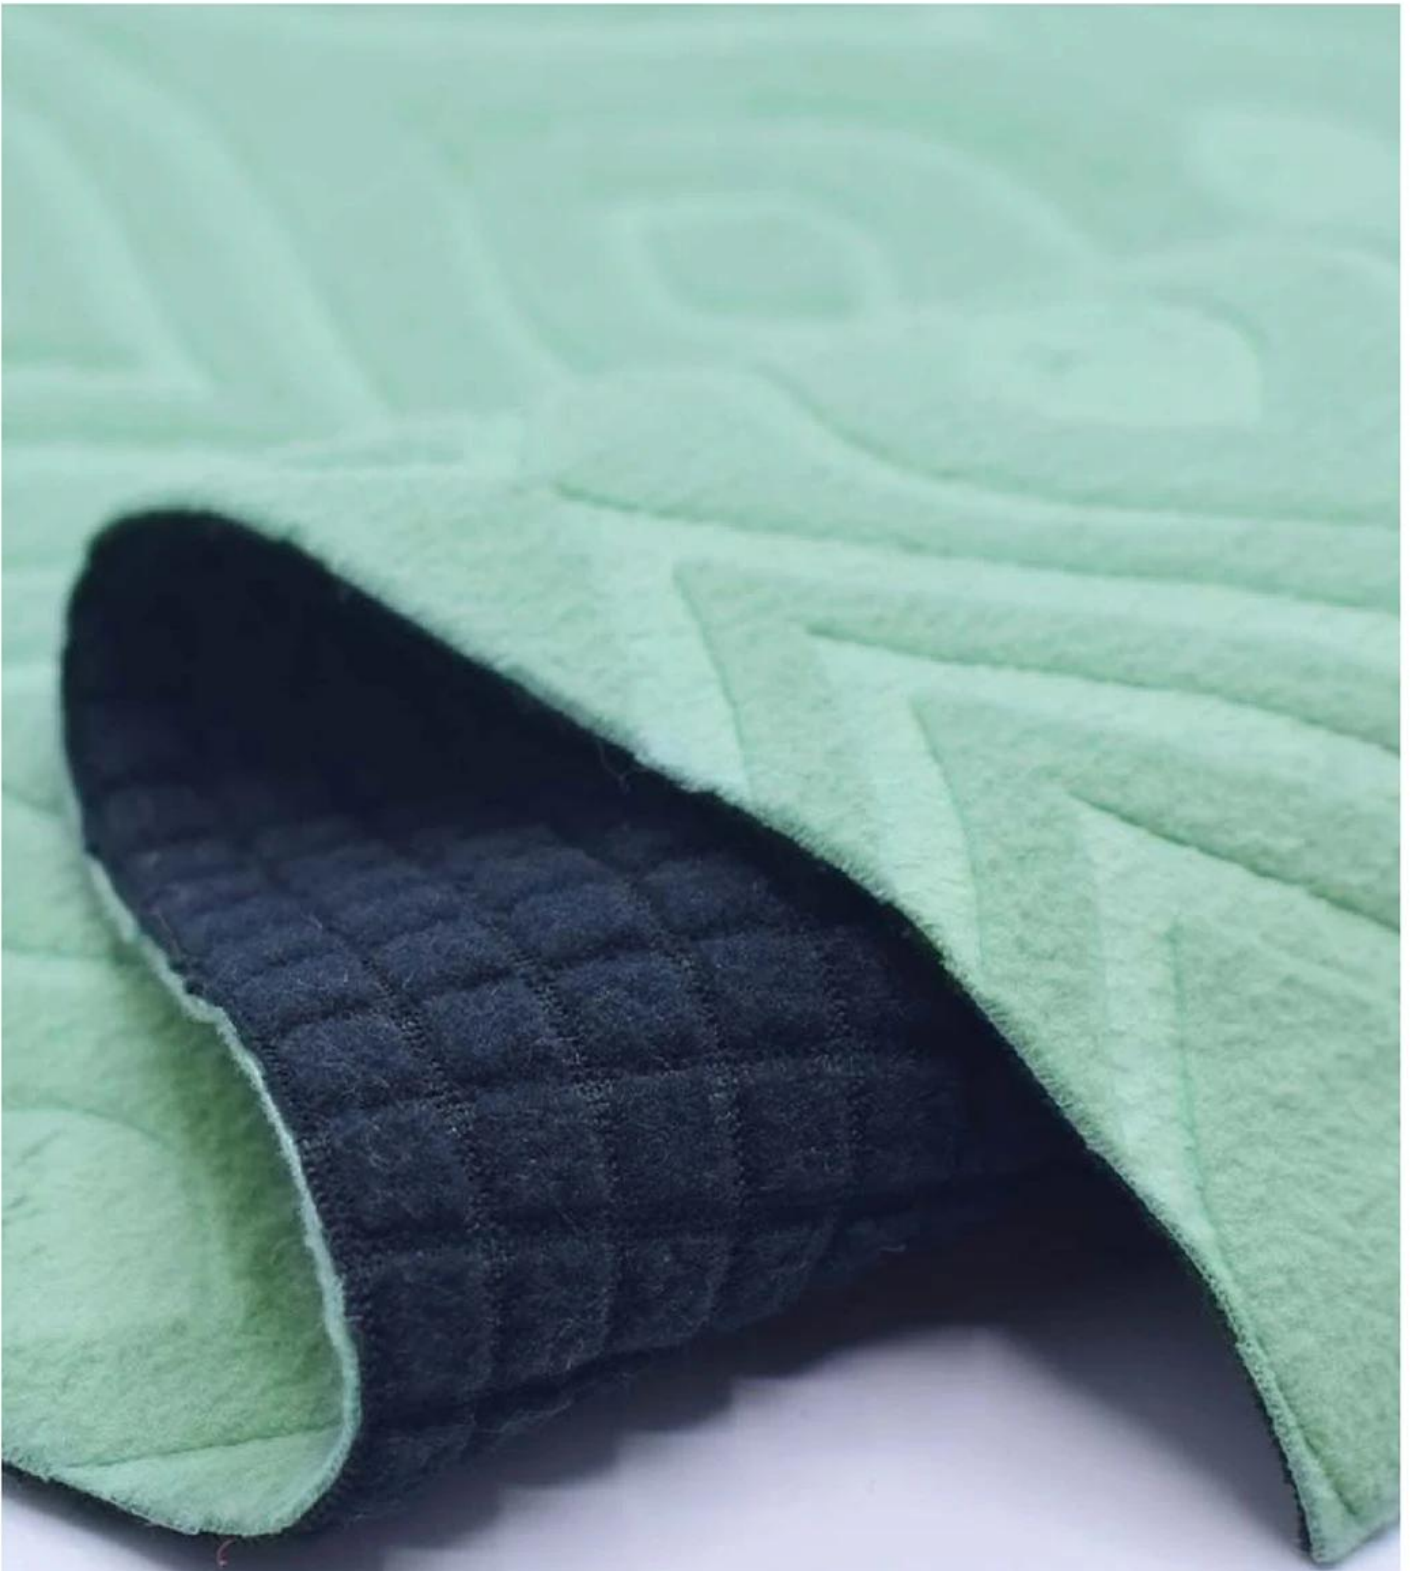

More impressive at JONG STIT

Printed Fabric

We provide various printed Fabric designs, depending on our customer's needs.

Special Finishing Fabric

Special Finishing Fabric is a fabric using Special Finishing techniques and Chemical treatment, such as Anti-bacterial, Water repellent, and water absorbency, on fabrics to enhance stunning blankets and premium products. Also special techniques like embossing, pleated, pattern sheering, etc.
